

Pre K Families,

Please join us in our 1st parent workshop of the school year. Our Master Teachers and Educational Supervisors will be providing an overview on what your preschooler is learning in the classroom. The goals of this training are:

- To gain an in-depth understanding of the Tools of the Mind Curriculum.
- To actively participate in a variety of activities experienced by your children throughout the school day.
- To provide you with different ways in which you can support your child's learning at home.
